9 am to 5 pm

Aetiological Investigations for Hearing Loss in Children

Aetiological Investigation of the babies identified through the Newborn Hearing Screening Program and diagnosed to have a hearing loss (from mild to profound), also covering investigation of older children, unilateral and progressive hearing loss and Auditory Neuropathy Spectrum Disorder.

The course will give delegates a good opportunity to meet leaders in the field of aetiological investigations for hearing loss in children and running established services, and also network with colleagues new to the field.

Who should attend?

Any professional providing an Aetiological Investigation service for children with permanent hearing loss. Preference will be given to those who have not followed the course within the last 3 years.

Topics covered:

- Current National guidelines for Aetiological Investigation of permanent childhood hearing impairment (from mild to profound)
- Roles of CMV, Imaging, Ophthalmology, Cardiology, Vestibular Assessment and Genetics of hearing loss
- Investigation of unilateral and progressive hearing loss
- Auditory Neuropathy Spectrum Disorder

Course Directors:

Dr Shankar Rangan, Consultant Audiovestibular Physician (Paediatrics), Wirral University Teaching Hospitals NHS Trust, Merseyside

Dr Adrian Dighe, Consultant Community Paediatrician

FEES:

Early Bird: £300 (until 31/07/23)
Standard fee: £350 (from 01/08/23)
